The screenshot shows a Google search result for 'weddings.io' in an Incognito browser window. The AI Overview section provides a summary of the platform, highlighting its AI-powered features for matching couples with vendors. A list of key features is provided, including cost, vendor discovery, a vendor hub, and availability. A social media snippet from Facebook is also visible, showing a post about the platform's development. At the bottom, there are links to the AIWeddings website and a Nextdoor post, along with a search bar for further exploration.

AI Overview

Weddings.io (aiWeddings.io) is an AI-powered wedding planning platform and vendor marketplace. It functions as a digital co-pilot, using artificial intelligence to match couples with vendors based on mood and budget while providing budget optimization, timeline automation, and a centralized communication hub.

Key features and details include:

- **Cost:** The platform is totally free for couples.
- **Vendor Discovery:** Couples can use predictive analytics to find and connect with local professionals.
- **Vendor Hub:** Vendors can use the SaaS platform to manage leads, and communicate directly with couples.
- **Availability:** While it features a global intelligent matching engine, its core platform heavily services the Greater Toronto Area.

To explore the tool, test out the AI vendor matching, or sign up as a vendor, visit [Weddings.io](https://www.aiweddings.io).
